

Project Specs

- 2025/26: a website for musicians

Project Specs

- Users can upload their lyrics and audio, and read/listen to the ones by the other users
- When uploading media (lyrics or audio), the user can decide whether it's premium or not
- Only premium users can access premium media
 - Ideally, a user becomes premium if he pays the site manager, which in turn gives a reward to the authors. But you don't have to implement this part.

Project Specs

- Before logging in, users can access no media
- Users can self-register by choosing their username and password
- Users log in with username/password
- Users can recover their account in case they forget their password
- The administrator user has a panel to change users' privilege from non-premium to premium and vice versa

Project Specs

UNIVERSITÀ DI PISA

- Lyrics are uploaded as text, and displayed directly on users' browsers
- Audios are uploaded as MP3 files, and downloaded by users

Project Specs

- All the attacks presented during the course must be defended, with redundant defenses in case
- All events useful for post-incident investigation must be logged
 - You don't have to implement real-time attack alerts

Project Specs

- Use PHP and MySQL for the back-end logic
 - You can use PHP libraries for specific purposes
- Use HTML and Javascript for the front-end logic
- Do not use frameworks (Node.JS, React, Express, Angular, etc.) nor templates (Twig, Smarty, Blade, etc.)
- Email sendings must be real, not simulated
- Please, do not use CAPTCHAs

Project Specs

UNIVERSITÀ DI PISA

- Project will be evaluated for:
 - Its security (aesthetics, usability, performance, extra features will not be evaluated)
 - The group's capability of explaining its implementation and its design choices
