

USER MANUAL

Action: visit home page

Actor: unregistered user

Flow: click on register to sign up.

Result: redirection to registration page.

Action: register page.

Actor: unregistered user.

Flow: complete the fields to register, read the received mail and confirm the registration.

Result: sign up procedure.

A screenshot of the MusicWave registration form. The browser's address bar shows 'localhost/register.php'. The form is titled 'Create a MusicWave Account' and includes four input fields: 'Username (Visible to others):', 'Email Address:', 'Password:', and 'Confirm Password:'. Each field has a small text box for hints and rules. The 'Register' button is at the bottom left, and a link 'Already have an account? Login here.' is at the bottom right.

Create a MusicWave Account

Username (Visible to others): 3 to 20 characters. Only letters, numbers, and the underscore () are allowed. No spaces or special characters.

Email Address: Please enter a valid email address. It will be used to log in and recover your account. (Max 255 characters)

Password: Length: 8 - 72 chars. Tip: To make it robust, include at least one capital letter, one number, and one symbol (e.g., @, #, !). Avoid common words.

Confirm Password: Please retype the password you entered above to verify that it is correct.

[Already have an account? Login here.](#)

A screenshot of the MusicWave registration form with the same fields as the previous image, but with sample data entered. The 'Register' button and the 'Login here' link are still present at the bottom.

Actor: logged user

Pre-condition: The user must have logged in successfully

Flow: Enter the parameters, choose whether to go premium or not, and upload. Repeat twice to create one premium and one non-premium audio.

Result: successfully uploaded two audio into the DB, one premium and one normal

Action: back to the dashboard

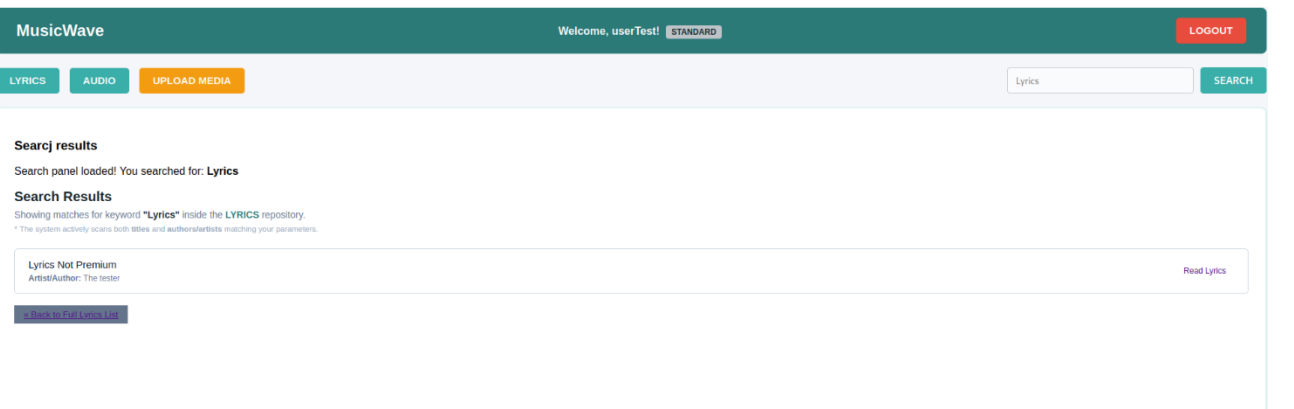

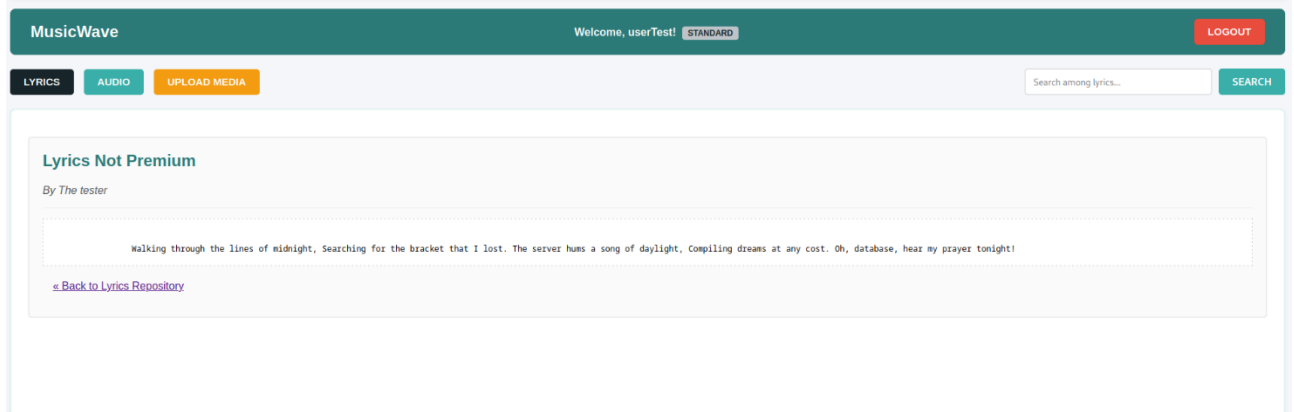

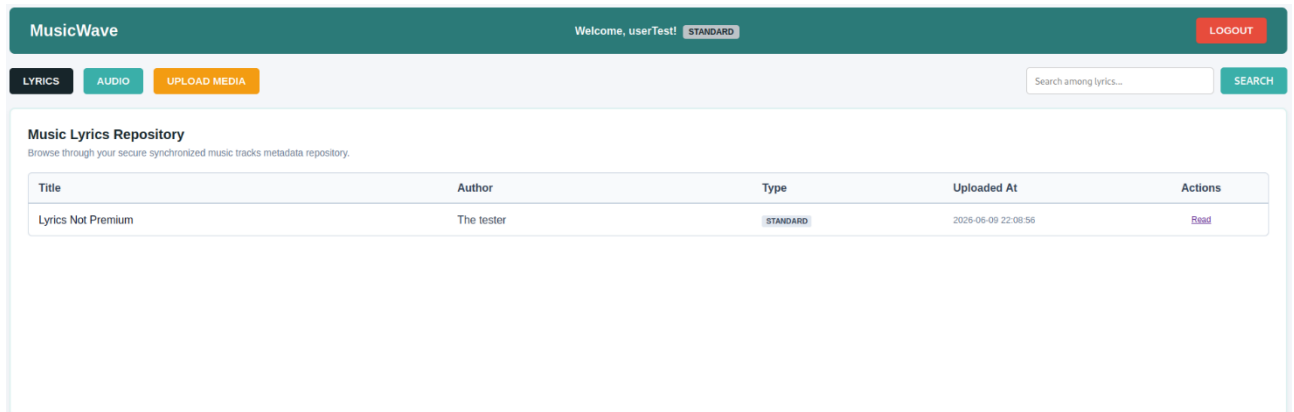

Action: see lyrics content and search among them (as shown in the last image)

Actor: logged user

Pre-condition: The user must have been successfully logged in and the song lyrics must have been uploaded to the DB.

Flow: Click the lyrics button, and all the lyrics will be displayed (in this case, only one non-premium one). From there, you can click on the text to view the full text.

Result: display lyrics and their text correctly.

Action: see, download audio content and search among them (as shown in the last image)

Actor: logged user

Pre-condition: The user must have been successfully logged in and the song lyrics must have been uploaded to the DB.

Flow: Click the audio button, and all the audio will be displayed (in this case, only one non-premium one). From there, you can click in the button to play the audio track. In this case, a playback panel will open on the right. You can also download the audio track by clicking the download button.

Result: correctly display the audio files in the database and listen to them.

The image displays three sequential screenshots of the MusicWave web application interface, illustrating the audio streaming and search functionality.

Top Screenshot: Audio Streaming Vault

- Header:** MusicWave, Welcome, userTest! STANDARD, LOGOUT
- Navigation:** LYRICS, AUDIO (selected), UPLOAD MEDIA
- Search:** Search among audios... SEARCH
- Audio Streaming Vault:** Select a track from the scrollable console panel to launch the streaming subsystem container.
- Track List:** Audio Not Premium, Author: The tester, Stream, Download
- Media Engine:** [Media Engine idle] Select a record to initialize safe streaming.

Middle Screenshot: Audio Streaming Vault (Playing)

- Header:** MusicWave, Welcome, userTest! STANDARD, LOGOUT
- Navigation:** LYRICS, AUDIO (selected), UPLOAD MEDIA
- Search:** Search among audios... SEARCH
- Audio Streaming Vault:** Select a track from the scrollable console panel to launch the streaming subsystem container.
- Track List:** Audio Not Premium, Author: The tester, Playing, Download
- Media Engine:** LIVE STREAMING, Now Playing: Audio Not Premium, 0:06 / 0:31, > Stop Stream / Reset Player

Bottom Screenshot: Search Results

- Header:** MusicWave, Welcome, userTest! STANDARD, LOGOUT
- Navigation:** LYRICS, AUDIO (selected), UPLOAD MEDIA
- Search:** Audio SEARCH
- Search Results:** Search panel loaded! You searched for: Audio. Search Results. Showing matches for keyword "Audio" inside the AUDIO repository. * The system actively scans both titles and authors/artists matching your parameters.
- Track List:** Audio Not Premium, Artist/Author: The tester, Stream Track

Action: login with admin

Actor: logged admin user

Pre-condition: The admin must be previously registered in the app.

Flow: The user enters their credentials in the respective fields and then clicks the login button.

Result: The user accesses the application by entering their dashboard (admin dashboard).

The screenshot shows the MusicWave Administrator dashboard. At the top, there's a header with 'MusicWave' and 'ADMINISTRATOR' on the left, and 'Welcome, Administrator (ID: 1)' and a 'LOGOUT' button on the right. The main content area is titled 'User Privilege Management' with a subtitle 'Promote or demote user account operational scopes inside the database architecture.' Below this is a table with columns: ID, Username, Email, Account Status, Current Privilege, and Actions. The table contains four rows of user data.

ID	Username	Email	Account Status	Current Privilege	Actions
14	expiredUserTest	expired@test.com	Pending	STANDARD	Make Premium
3	prem_user	premium@musicwave.it	Active	PREMIUM	Revoke Premium
2	user	user@musicwave.it	Active	STANDARD	Make Premium
13	userTest	project_snh_26_user@libero.it	Active	STANDARD	Make Premium

Action: set premium an user

Actor: logged admin user

Pre-condition: The admin must be previously registered in the app and there must be a user with standard role present in the DB.

Flow: Select the standard user to whom you want to grant privileges and click on the "make premium" button.

Result: A success or error message will be displayed on the screen. If the operation is successful, the user's status is updated.

This screenshot shows the same MusicWave Administrator dashboard as before, but with a green success message at the top: 'User privilege updated successfully.' The table below now shows that the user 'user' (ID 2) has been updated to 'PREMIUM' status, and 'userTest' (ID 13) has also been updated to 'PREMIUM' status.

ID	Username	Email	Account Status	Current Privilege	Actions
14	expiredUserTest	expired@test.com	Pending	STANDARD	Make Premium
3	prem_user	premium@musicwave.it	Active	PREMIUM	Revoke Premium
2	user	user@musicwave.it	Active	STANDARD	Make Premium
13	userTest	project_snh_26_user@libero.it	Active	PREMIUM	Revoke Premium

Action: login with the user becoming premium to see premium media

Actor: logged premium user

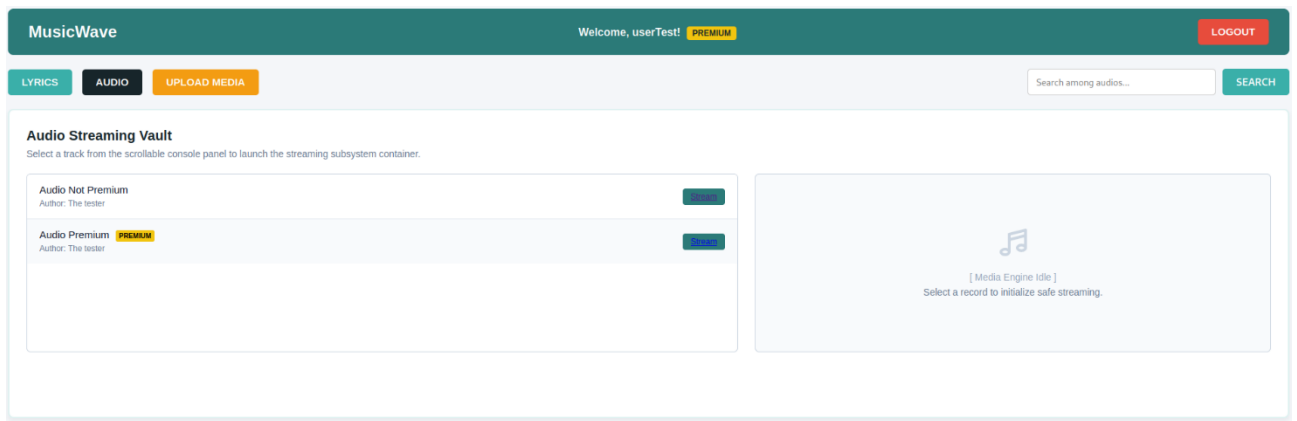

Pre-condition: A premium user already registered in the DB.

Flow: Log in as seen previously, once in the dashboard click on audio or lyrics.

Result: View all media, including premium media.

The screenshot shows the MusicWave user dashboard. The header has 'MusicWave' and 'Welcome, userTest! PREMIUM' on the left, and a 'LOGOUT' button on the right. Below the header are three tabs: 'LYRICS', 'AUDIO', and 'UPLOAD MEDIA'. A search bar is on the right with the placeholder 'Search among lyrics...' and a 'SEARCH' button. The main content area is titled 'Music Lyrics Repository' with a subtitle 'Browse through your secure synchronized music tracks metadata repository.' Below this is a table with columns: Title, Author, Type, Uploaded At, and Actions. The table contains two rows of lyrics data.

Title	Author	Type	Uploaded At	Actions
Lyrics Not Premium	The tester	STANDARD	2026-06-09 22:08:56	Read
Lyrics Premium	The tester	PREMIUM	2026-06-09 22:32:59	Read

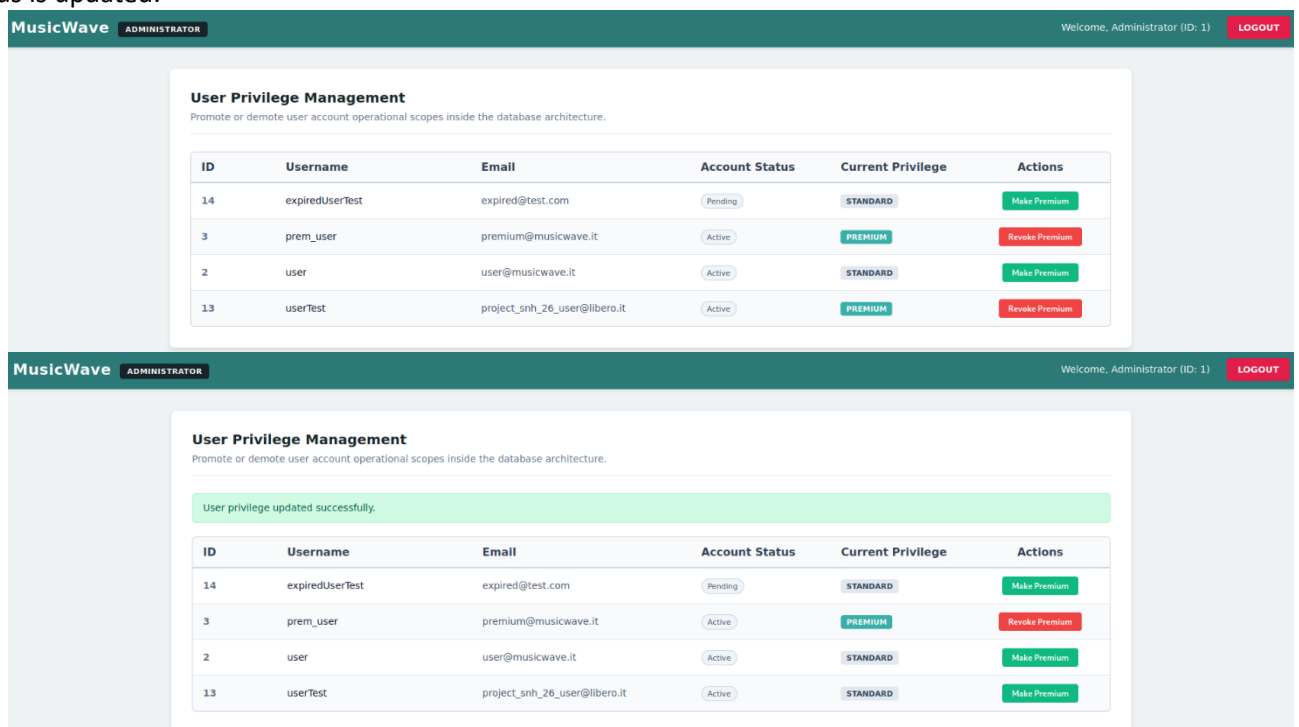

Action: set standard an user

Actor: logged admin user

Pre-condition: The admin must be previously registered in the app and there must be a user with premium role present in the DB.

Flow: Select the premium user to whom you want to revoke privileges and click on the "Revoke premium" button.

Result: A success or error message will be displayed on the screen. If the operation is successful, the user's status is updated.

Action: change a user's password

Actor: logged user

Pre-condition: a user already logged in

Flow: On the login page, click the link if you forgot your password. Then, in the form that appears, enter the email address associated with your account. Check your inbox for the email you receive and click the link inside. Enter your new password and change it.

Result: The user changes his password.
